

PowerMEMS 2018 submission guidelines
Journal of Micromechanics and Microengineering (JMM)

Journal of Micromechanics and Microengineering - iopscience.org/jmm

Submissions to the special issue

All Special Issue articles must comprise new, significant and unpublished work. No overview or perspectives-type articles will be considered for publication. Papers are refereed to the same high standards as regular research articles. (Note that all submissions are submitted to a plagiarism detection system.) Articles reporting work that was originally presented at the PowerMEMS conference may be submitted, provided that it does not also appear in the conference proceedings.

How to submit

Papers should be submitted online at: mc04.manuscriptcentral.com/jmm-iop

On the Article Information page select 'Special Issue Article' as the article type.

A drop-down menu will appear where you should choose: 'Selected papers from PowerMEMS 2018'.

Published papers

The accepted papers will be collected on a special issue landing page (like this one from the 2017 edition:

<http://iopscience.iop.org/journal/0960-1317/page/PowerMEMS-2017>).

Therefore, there will be no delay in the publication of accepted papers. Each paper will be published in the issue which is open and then collected in virtual collection.

Notes

JMM has no page limits and no page charges.

Papers must fit the scope of the journal: <http://iopscience.iop.org/journal/0960-1317/page/Scope>

Author guidelines can be found at <http://iopublishing.org/img/landingPages/guidelines-and-policies/>

Please email any submission queries to jmm@iop.org
